

TOM NEEDS YOUR SUPPORT

Thomas Carver's story might not be known to all of you. Tom lives with his family in Arrecife and is a very beloved person who attends our services in Puerto del Carmen together with his father, Simon Carver.

He fell terribly ill in January 2013 at the age of only 21. What was thought a bad cold was in fact a virus that shut down multiple organs and his life was on the edge. He spent weeks in ICU, specialised hospitals and recovery and made steady progress over the years, but the damage to his brain and organs is so massive that further steps now have to be taken to hopefully allow him to regain a quality of life which he deserves.

We are supporting Tom and his family by raising donations to afford a very promising and innovative therapy in Valencia. The costs for the first trip were 2.000 €. But there will be more and longer trips for further assessments. Too much for anyone – but please consider helping Tom with whatever you can afford – any donation big or small is very much appreciated as are your prayers for Tom and his family.

We also have a donation box especially for Tom at the back of the church. God bless you.

First update November 2019:
The assessment in Valencia went very well and Tom will go on with this special treatment – so we keep raising money to make sure this wonderful lad can keep working on his progress which will take a long time!
